

Quality Engineering Inside and Out

GP Sorensen is your source for quality-engineered battery cables and related components. Each cable features advanced technology that delivers superior power, efficient performance, and ease of installation to outlast and outperform the competition. Take FA70-2HDA for example:

FA70-2HDA
SKU 1053149

Gauge meets or exceeds
OE performance for
voltage flow

Crosslinked synthetic rubber
jacket protects against abrasions,
melting, and corrosion while
remaining flexible in all conditions,
including cold weather

100% copper, brass,
or stainless terminal
maximizes voltage
transfer

OE-style
terminals
ensure
proper fit

Loom is applied where
applicable to help keep outside
elements from the outer jacket

Tech Tip

To minimize the risk of shock when replacing battery cables, always disconnect the negative terminal first when removing the battery and reconnect it last when installing the battery.
