

QUALITY ADVANTAGE EVAPORATORS

O.E. FIT & FORM EASY DROP-IN-REPLACEMENT

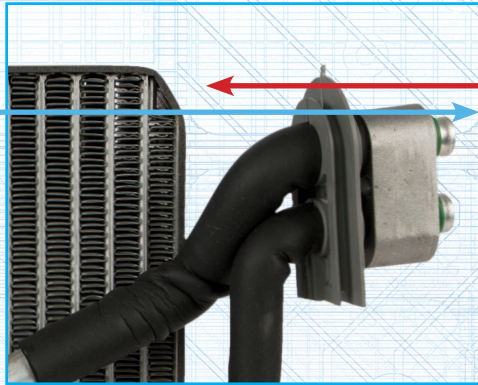

THE FOUR SEASONS® DIFFERENCE

Four Seasons® P/N 44100

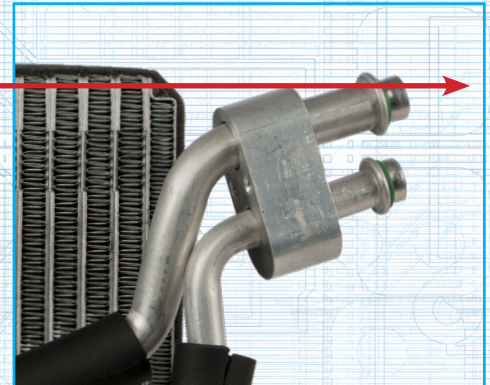

FOUR SEASONS® UNIT

O.E. UNIT

COMPETITOR UNIT

Four Seasons® evaporator fitting alignment closely matches O.E. location for easy replacement.

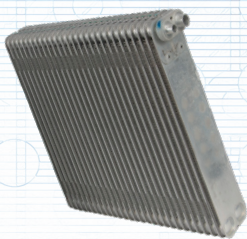

Competitor fitting location requires the installer to “push” the fitting down to align with the case opening, which could cause the tube welds to crack and leak.

Four Seasons® P/N 54840

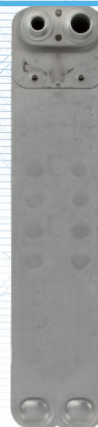

FOUR SEASONS® UNIT

O.E. UNIT

COMPETITOR UNIT

The Four Seasons® unit is designed to O.E. height specifications for a hassle free replacement.

The competitor evaporator stands 20mm (3/4”) shorter than the O.E., which reduces surface area for cooling and requires a large amount of foam to fill the gap.
